<https://www.linkedin.com/in/ayman-maab-0864b4255/>

PROFESSIONAL SUMMARY

Software Engineer with a background in Computer Systems Engineering and experience in full-stack development, backend systems, and scalable web applications. Skilled in React.js, NestJS, Node.js, and Python, with strong knowledge of API development, database design, system architecture, and performance optimization. Also experienced in Artificial Intelligence and machine learning, including predictive models and RAG pipelines, with the ability to build practical, efficient, and user-focused software solutions.

EDUCATION

University of Engineering and Technology Peshawar
Bachelor of Science, Computer Systems Engineering
Related Coursework:

Peshawar, Pakista
Nov 2021 – Oct 2025

Artificial Intelligence, Computer Architecture, Data Structures & Algorithms, Database Systems, Data Analytics, Computer Security

RELEVANT EXPERIENCE

Insight Technology

SOFTWARE ENGINEER (FULL STACK)

Dec 2025 - Present

- Developed scalable web applications and backend systems for industry-based projects using React.js, NestJS, and Node.js.
- Built and maintained REST APIs, authentication systems, database schemas, and third-party integrations to support business requirements.
- Worked on workflow automation features, background job processing, and queue management using Redis and BullMQ.
- Developed responsive and modern user interfaces using Tailwind CSS, Tamagui, Shadcn UI, and React Flow, while using PostgreSQL, Docker, and Git for database management, deployment, version control, and team collaboration.

TechKhwa

GEN AI ENGINEER - INTERN

May 2025 - Sep 2025

- Collaborated with industry mentors to design and develop AI-driven solutions using Python and OpenAI API.
- Built and optimized document-based chatbots and RAG applications with LangChain and FAISS.
- Gained hands-on experience in prompt engineering, LLM fine-tuning, and deploying generative AI models.

PROJECTS

- Multimodal Product Review Analyze:** - Developed a multimodal AI system combining product image classification and review sentiment analysis, implementing CLIP + BERT for recommendation scoring. Built a production-ready FastAPI backend with an interactive Streamlit dashboard and modular, scalable architecture for real-time insights.
- AI Health Information Assistant (NLP + Healthcare):** - Collected and preprocessed medical QA datasets. Used BioBERT and DistilBERT embeddings to build a retrieval-based QA system. Integrated vector databases and API layer for real-time question-answer handling.
- MediChatBot – AI Medical Assistant:** - Built a conversational AI chatbot using NLP and medical datasets for symptom analysis and health recommendations.
- askyourrights.ai – AI Legal Rights Assistant:** - Developed a web app using LangChain and OpenAI API to inform users about their legal rights based on local laws and retrieved case documents.
- Sentiment Analysis Engine for E-Commerce Product Reviews:** - Trained ML models to analyze customer reviews and classify sentiments for business insights.
- Smart Muscle Monitoring & Posture Enhancement (FYP):** - Designed a wearable system using sensors and AI for real-time muscle posture correction.
- Agentic AI Systems:** - Experimented with multi-agent frameworks where different agents handle specific tasks like data retrieval, summarization and reporting.

SKILLS

Certification :

- [Supervised Machine Learning: Regression and Classification - Stanford \(Coursera\)](#).
- [Building Generative AI-Powered Applications with Python](#)
- [AI for Everyone - Andrew Ng \(Coursera\)](#).
- [Generative AI for Software Development \(Coursera\)](#).
- [Flutter & Dart - Complete Guide \(Udemy\)](#).
- [Machine Learning with Python \(Coursera\)](#).
- [Python for Data Science, AI & Development \(Coursera\)](#).
- [Developing AI Applications with Flask \(Coursera\)](#).
- [Generative AI Explorer - Vertex AI](#)
- [Detect Manufacturing Defects using Visual Inspection AI](#)
